Our finish is a nitrocellulose lacquer. Lacquers are a popular finish type for furniture, and the preferred choice of professional furniture makers. Lacquers provide a clear, durable, and water-resistant finish that protects the base material while also enhancing its appearance.

Bamboo has a higher tensile strength than metal. This means that if you pull on a piece of bamboo and a piece of metal, it will take more force to break the bamboo.

For every bamboo product purchased, Copernicus will make a donation to conserve natural panda habitat through the World Wildlife Fund.
